☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Claims 1-22 YES
Claims NONE NO

Inventive step (IS)

Claims 1-22 YES
Claims NONE NO

Industrial applicability (IA)

Claims 1-22 YES
Claims NONE NO

2. Citations and explanations:

Claims 1-22 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the followings:

A method/system or computer readable medium having instruction for providing end to end communication between a first node and a second nodes, wherein the first node belong to compatible tandem free operation (TFO) network, while the second node belong to a non-compatible TFO network. The end-to-end connection comprising legs that are established in both TFO and non-TFO networks by an intermediate node situated between the first and second node, as indicated in independent claims 1, 9, 15 and 21.

Claims 1-22 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry such as mobile-to-PSTN devices communications, the mobile may have adaptive transmission rates that are not supported by the conventional PSTN network devices.
